

### **REMARKS/ARGUMENTS**

The Office Action mailed January 6, 2005 has been reviewed and carefully considered. Each of the pending claims 1-26 were found to be allowable.

In the Office Action mailed January 6, 2005, the specification is objected to because the Examiner alleges that the trademarks PGP, SIM, and PC-Phone are used. The specification has been amended to indicate that PGP is a trademark. SIM is an acronym for Security Identity Module. Although there are various trademarks for SIM, none of these trademarks relate to the generic term Security Identity Module as used in the present application. Furthermore, the specification has been amended to delete the term PC-Phone and rewritten to indicate that this term relates to a PC to Phone interface.

The Examiner objects to the term "(TBD)" on page 9, line 19. This term has been deleted from the specification.

The Examiner also states that acronyms PGP, S/MIME, and NID are not spelled out or defined. The specification has been amended to spell out these and other acronyms which were found in the specification during review of the application for purposes of this response.

In view of the amendments and remarks, the objections to the specification should now be withdrawn. The application is now deemed to be in condition for allowance and early notice to that effect is solicited.

It is believed that no fees or charges are required at this time in connection with the present application. However, if any fees or charges are required at this time, they may be charged to our Patent and Trademark Office Deposit Account No. 03-2412.

Respectfully submitted,

COHEN, PONTANI, LIEBERMAN & PAVANE
